

Figure 1 consists of six sub-diagrams labeled (a) through (f), arranged vertically. Each diagram shows a 5x5 grid of particles, represented by small black dots. Red lines represent the trajectories of these particles. The trajectories start in a disordered state in (a) and (b) and become increasingly organized in (c) through (f), eventually forming a hexagonal-like pattern. A legend in diagram (c) identifies the symbols: a red dot for 'Particle', a red line for 'Trajectory', a green dot for 'Center of mass', and a green line for 'Trajectory'.
